EDUCATION

B.Tech in Computer Science and Engineering

IPS Academy, Indore

2023–2027

CGPA: 7.78

SUMMARY

Computer Science undergraduate with hands-on experience in web development, Python, machine learning, and software projects, with a strong foundation in C++ and Data Structures & Algorithms. Experienced with HTML, CSS, JavaScript, Git/GitHub and Python-based libraries, with ongoing focus on full-stack development using the MERN stack. Strong interest in building practical software solutions and applying problem-solving skills to real-world applications.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

Web/Full-Stack: HTML, CSS, MERN (MongoDB, Express.js, React, Node.js)

Libraries & Frameworks: Pandas, NumPy, OpenCV

Tools & Database: Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, OOP, DBMS, OS, Machine Learning

Soft Skills: Problem Solving, Communication, Teamwork, Leadership

PROJECTS

My Portfolio Website

- Built a responsive personal portfolio website to showcase projects, technical skills, professional experience, certifications, and achievements.
- Designed structured sections and responsive layouts with HTML and CSS, with JavaScript used for interactive elements.
- Applied responsive design techniques and tested the website across different screen sizes for cross-device compatibility.

ScreenSent

- Built a movie recommendation web application using Python and Flask, combining movie metadata from the TMDB 5000 dataset with an interactive web interface.
- Applied TF-IDF vectorization and cosine similarity to analyze movie overviews, genres, and cast information and generate content-based recommendations.
- Integrated TMDB API to retrieve movie posters and display categorized movie collections through a responsive HTML, CSS, and JavaScript interface.

Image Colorization

- Built an end-to-end Computer Vision system that converts grayscale images into colorized outputs using Python, PyTorch, and CNN-based encoder-decoder architecture.
- Prepared image data through resizing, grayscale conversion, LAB color-space processing, normalization, and batched loading for model training.
- Trained the colorization model using PyTorch, incorporating dataset utilities, model checkpoints, and dedicated training and testing workflows.

EXPERIENCE

Event Coordinator

FlutterFlow Developers Group, Indore

Oct 2024 – Nov 2025

- Coordinated technical events and community activities, supporting event planning, communication and participant engagement.

Student Ambassador

LetsUpgrade

Dec 2024 – Nov 2025

- Promoted technical learning programs and engaged with students through community outreach and communication.

CERTIFICATIONS & ACHIEVEMENTS

- Mastering Data Structure and Algorithms using C and C++ — Udemy
- Crash Course on Python — Google
- Introduction to Modern AI — Cisco Networking Academy
- Azure Explorer: Mastering the Fundamentals Challenge — Microsoft
- Microsoft Azure AI — Microsoft
